Evalify

ABOUT EVALIFY

One platform for every exam your institution runs.

Evalify is an AI-driven assessment platform for higher education: a single environment to author, conduct, evaluate, analyse, and improve examinations at institutional volume.

PROBLEM STATEMENT

Institutions still assemble assessment from paper, quiz apps, spreadsheets, and manual review. The result is slow feedback, inconsistent grading, scattered evidence, and overloaded faculty.

From 50 hr to 14 min

420 descriptive papers returned with the same rubric, audit record, and faculty review path.

Evalify

Workflow / Evaluation

Six steps become one continuous academic loop.

01	02	03	04	05
Author	**Configure**	**Conduct**	**Evaluate**	**Report**
Question banks, syllabus import, and rubric definition.	Rules for timing, attempts, randomisation, proctoring, and access.	Secure exams with autosave, device discipline, and live integrity logs.	Objective, descriptive, coding, and fill-in responses graded at scale.	Cohort trends, weak-topic signals, exports, and institutional audit trails.

CS-301 · DESCRIPTIVE RESPONSE · Q4

Explain how a deadlock can occur in a multi-threaded system.

✓	Defines deadlock correctly	2 / 2
✓	Lists Coffman conditions	2 / 2
✓	Uses a concrete example	2 / 2
~	Discusses prevention	1 / 4

Score 7 / 10

Evalify Impact / Contact

ANALYTICS, SECURITY, INTEGRATIONS

Readable evidence for faculty, administrators, and institutional review.

Analytics & Reporting

Question-level difficulty, weak-topic clusters, cohort dashboards, exports, and review-ready evidence.

Security & Scalability

RBAC, audit logs, subnet controls, kiosk mode, score override history, and multi-institution administration.

Integration Capabilities

Bulk upload from Excel, syllabus PDF workflows, LMS-ready exports, department-level roles, and API-friendly architecture.

Evalify

Assessment Infrastructure Brief

EVALIFY

Institutional assessment, organised for scale.

01

AI-Powered Evaluation

Rubric-led scoring for descriptive answers, MCQs, code, and fill-in responses, with faculty review where judgement matters.

02

Analytics & Reporting

Question-level difficulty, weak-topic clusters, cohort dashboards, exports, and review-ready evidence.

03

Security & Scalability

RBAC, audit logs, subnet controls, kiosk mode, score override history, and multi-institution administration.

04

Integration Capabilities

Bulk upload from Excel, syllabus PDF workflows, LMS-ready exports, department-level roles, and API-friendly architecture.

Evalify

PROBLEM STATEMENT

Disconnected tools create operational risk.

Institutions still assemble assessment from paper, quiz apps, spreadsheets, and manual review. The result is slow feedback, inconsistent grading, scattered evidence, and overloaded faculty.

> **Evalify replaces the assessment patchwork with one governed platform.**

01

Author

Question banks, syllabus import, and rubric definition.

02

Configure

Rules for timing, attempts, randomisation, proctoring, and access.

03

Conduct

Secure exams with autosave, device discipline, and live integrity logs.

04

Evaluate

Objective, descriptive, coding, and fill-in responses graded at scale.

05

Report

Cohort trends, weak-topic signals, exports, and institutional audit trails.

Evalify

Controls / Reporting

CS-301 · DESCRIPTIVE RESPONSE · Q4

Explain how a deadlock can occur in a multi-threaded system.

✓	Defines deadlock correctly	2 / 2
✓	Lists Coffman conditions	2 / 2
✓	Uses a concrete example	2 / 2
~	Discusses prevention	1 / 4

Score 7 / 10

01

Consistent descriptive evaluation with faculty-defined rubrics

02

Shorter assessment cycles without losing human academic oversight

03

Unified workflows for faculty, students, administrators, and departments

04

Evidence-ready reporting for reviews, accreditation, and appeals

Security & Scalability

Role-based access · audit trails · subnet controls · kiosk mode · multi-institution administration

for the institution.

author, conduct, evaluate, analyse, and improve examinations at institutional volume.

Evalify

Academic Context

ABOUT EVALIFY

Faculty-defined intelligence, not a black box.

Evalify is an AI-driven assessment platform for higher education: a single environment to author, conduct, evaluate, analyse, and improve examinations at institutional volume.

PROBLEM STATEMENT

Institutions still assemble assessment from paper, quiz apps, spreadsheets, and manual review. The result is slow feedback, inconsistent grading, scattered evidence, and overloaded faculty.

Designed for real exam cycles: departments, labs, invigilators, faculty review, and post-exam reporting.

Evalify

Workflow / Process

From syllabus to reviewed results.
